

ICOI Winter Symposium

Bellagio Hotel ~ Las Vegas, Nevada ~ February 10-12, 2011

Auxiliary Program:

MISSION STATEMENT

This ADIA Symposium is aimed at enhancing understanding and providing education and awareness about the prevention of oral diseases. Screening processes as well as treatment modalities for care will be discussed. We will also focus on enhancing the understanding of patient assessment, treatment planning, and clinical procedures through all phases of implant dentistry. New concepts, techniques and technologies will be presented to keep team members on the cutting edge of advances in implant dentistry.

OBJECTIVES

Upon Completion of this 2 ½ day program auxiliaries will learn:

- Develop an appreciation for the role of dental implants in the maintenance of oral health
- Learn screening techniques for oral diseases
- Review techniques for obtaining oral photographs
- The criterion to optimize the sequence of treatments for simple to complex cases
- Understand systemic diseases and their impact on implant therapy treatment plans
- Understand the use of CT technology in implant dentistry
- Understand different connections of implants and their components
- Review how orthodontic treatment can be a part of dental implant treatment plans

A major goal of the ADIA educational programs is to help create well-rounded, cross trained auxiliaries. There is value in having a team that is trained in ALL aspects of implant dentistry, as well as, the personal value the auxiliary will possess. We hope that all team members will aspire to achieve Fellowship in the ADIA and one means of attaining this goal is to be sure to attend each of the certification programs regardless of your given position in the practice. We respect the individual needs of our attendees and encourage them to review the doctors' main podium topics for areas of advanced needs and interests with attendance at no cost. For more information please go to www.adiaonline.org.

The ADIA has gone "Green" and we will no longer provide printed handouts for participants at meetings. ADIA registered participants will receive an email with a password to access the ADIA website in order to print the handouts themselves. Handouts will be available on the website 1 month prior to each meeting and for 2 weeks after. For this event, handouts will be available beginning January 10th. It is important that all ADIA registrants provide their email address to the main ICOI office at info@dentalimplants.com. For onsite registrants, the ADIA web address and password will be provided in the registration packet. In this way, on site registrants can print the handouts at their hotel or wait until after the meeting.
